**COINCIDENT AND LEADING COMPOSITE BUSINESS
CYCLE INDICATOR, BUSINESS CYCLE CLOCK****quarterly edition**

release date – March, June, September, December

The current work on experimental statistics involves analysis of business cycles based on composite (synthetic/aggregated) indexes providing synthetic descriptions of fluctuations throughout the economy. The coincident (COINC) and leading (LEAD) aggregated business tendency index have been estimated. The coincident (simultaneous) index reflects the current business tendency, while the leading business tendency index shows the future business tendency at a specific time in advance. The business cycle clock (a graph of business cycle phases) is a tool that facilitates the analysis of the business cycle. It is a graphic presentation of the place of various economic variables (aggregated or simple indices) in the business cycle. Its primary purpose is to illustrate the phenomenon in a mid-term time perspective. The clock is an illustration in the form of a coordinate system.

KLEMS ECONOMIC PRODUCTIVITY ACCOUNTS

(English version: preface, contents, synthesis)

annual edition

release date – December

ca. 150 pages, size: 210x270 mm
price: PLN 20.00**18 575/00**

The work on experimental statistics involves research on the implementation of the KLEMS productivity accounts in Poland. The decomposition of economic growth in the KLEMS accounts for Poland was done in the form of gross value added decomposition. The KLEMS accounts provide the basic macroeconomic information (by PKD 2007 groupings) on the economy, and they are an important tool helping an analyst of the economic growth. The economic growth decomposition allows its sources to be determined, and therefore indirectly interpret its causes. It can form a basis for numerous analyses and studies of economic growth and for international comparisons with other countries using these accounts. The publication includes: KLEMS accounts methodology for the Polish economy; KLEMS tables for the Polish economy; comparison of KLEMS productivity accounts results for the Polish economy and results published for the EU KLEMS countries.
